

Smart Chicken®

Smart Chicken® was the first poultry produced in the United States utilizing the pure air chill technology in place of water immersion. They also use Controlled Atmosphere Stunning, ensuring that all birds are handled with care in every aspect of production even through harvest.

Raising Quality - Organic Smart Chicken®

In addition to the benefits obtained from the standard Smart Chicken® diet, Organic Smart Chicken® is also certified organic. This certification is your assurance that our product is naturally safe and healthy for you and your patrons. The organic diet consists of corn and soybeans that have been grown on land certified free of chemicals like pesticides and herbicides for a minimum of three years. As in the Veg-Fed diet, we also include the perfect scientific mix of vitamins and minerals (micros) to optimize bird health.

Free Range

All Organic Smart Chicken® birds are free range. This means they are given access to the natural outdoor environment on our free range farms with plenty of access to fresh air and sunlight. Smart Chicken® is also dedicated to practicing sustainable agriculture which ensures the preservation of our environment for generations that follow.

Committed to Green

Smart Chicken® is committed to environmental stewardship and preservation of natural resources. . The company uses sustainable practices such as using local feed vendors and reducing their carbon foot print.

No Added Water
No Antibiotics
No Hormones
